DESCRIPTION

COLLAMAT 7300 high-speed self-adhesive labelling machine can be configured in all parts, equipped with interchangeable accessories and a practical and simple control panel. Its versatility and maximum functionality ensure fast and accurate application for all types of products.

FAST, PRECISE AND ACCURATE Versatile, precise and reliable labeller. This solution stands out for its modularity and maximum functionality, thanks to a simple and practical control panel. The graduated potentiometers can be used to adjust: speed, photo-label calibration, label advancement. Equipped with a stepper motor and microprocessors that allow a distribution speed from 3 to 50 m/min for the Collamat 7310 version and from 3 to 40 m/min for the Collamat 7320, the 7300 ensures fast and accurate application for all type of products.
